Proven touch points

for enhancing your seating environment

Touch point solutions ensure a positive first impression while providing optimum comfort, safety and intuitive operation. Southco solutions include:

- Position control devices that consistently hold display screens, armrests, headrests and drop-down tables.
- Quarter-turn fasteners that offer convenient access to hidden mechanical and electronic systems within the seat.
- Southco offers solutions for a range of seating applications including:
 - Headrests
 - Armrests
 - Coat hooks
 - Hidden electrical boxes
 - LCD screens
 - Drop-down tables

First class

Economy class

Headrests

Southco's headrest capabilities include off-the-shelf constant torque hinges through to custom designed headrest solutions with fully integrated constant torque hinges.

Hidden electrical boxes

Southco provides a complete range of solutions for under-seat electrical boxes, from quarter-turn fasteners to cable ties and bushings.

Armrests

Counter-balanced torque hinges provide infinitely variable position control with the addition of assisted motion in a single direction.

Coat hooks

A stylish coat hook designed to balance aesthetics with functionality. The push-push mechanism provides a "spring-out" coat hook, which sits flush to the surface when not in use.

LCD Screens

Constant torque hinges provide infinitely variable position control of LCD screens.

Drop-down tables

The use of constant torque hinges in drop-down and folding tables help make them feel more substantial without adding weight, while also improving the quality of motion and providing increased levels of passenger safety.
